SAFETY BARRIER

HOARDING

CONE

SAFETY ROAD BARRIERS

(Water-filled for superior safety)

INCA'S UNIQUE FEATURES

- Can be stored in reverse, optimizing storage space
- Unique connecting pin provides superior "shear strength" in the event of an impact
- Easy to shift even when filled with water:
 - Deep slots on both ends allow for maximum leverage
- Non-glare matt finish
- Customized embossed company logo discourages theft

ADDITIONAL FEATURES

- Superior visibility, day or night
- Highly resistant to corrosive agents
- "Ultra Shield" UV protection for superior product life
- Easy to handle without cranes or heavy equipment
- 200 kilos of crash protection in every barrier (when water-filled) assures safety for workcrews and Motorists alike
- Deployment angle of up to 28° between barriers allow for placement even on extremely curved roads

HOARDING

- Keeps traffic flowing by preventing motorists from viewing construction work
- Unique patented all plastic design allows for fast placement and removal plus the added safety of no metal parts
- Doubled walled air buffer acts as a sound barrier
- Creates high visibility with its "checker board" pattern
- Less likely to topple in high winds - designed to separate at one meter intervals in extreme weather conditions
- Smooth aerodynamic surface prevents "sail effect"
- Easy placement of your company's logo increases publicity while discouraging theft

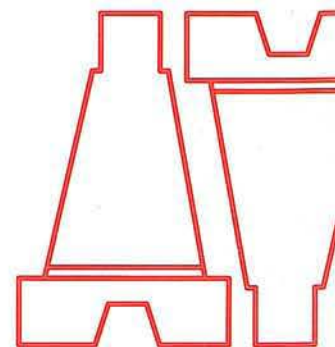

INCA's Traffic Management solution to your traffic management needs assures the safety of workers and motorists through innovative design features and low costs.

*It is recommended to fill barriers with water.
